Eden Hydrogen Fuels 2008 Hydrogen Road Tour

HyRadix Reformers Produce Hydrogen Onsite in Thousand Palms, California

Chicago, IL, USA – On Saturday, August 23, The Hydrogen Road Tour 2008 arrived at the SunLine Transit Terminal in Thousand Palms, California to fuel a caravan of hydrogen vehicles on the final leg of a cross country journey that stretched from Portland, Maine to Los Angeles, California.

The event at SunLine headquarters showcased the Road Tour's fleet of hydrogen-powered vehicles, demonstrating the commercial viability of hydrogen-based fuel. As the Road Tour made its way to Los Angeles, SunLine's Hydrogen Fuel Cell bus was an impressive addition. The bus, one of two hydrogen buses in SunLine's fleet, currently provides service to the Coachella Valley, showing that hydrogen technology is not a dream of the future, but a realization now.

SunLine is home to Eden Hydrogen's HyRadix hydrogen reformer, one of the industry's most advanced technologies, enabling third party refueling of commercial vehicles. The HyRadix reformer supplied fuel to nine of the Road Tour's gaseous hydrogen vehicles.

"The key to accelerating public acceptance of alternative fuel vehicles is to show they are in active use today," said SunLine General Manager C. Mikel Oglesby. "This is the inspiration behind the Road Tour and why we're excited to be a part of the event."

Paul Brubaker, Administrator with the U.S. Department of Transportation's Research and Innovative Technology Administration, addressed the gathering at the event, saying, "The technology to put these kinds of vehicles on the road—and keep them moving—exists today. The question is not if hydrogen-powered vehicles will be commercially available, but when."

"As always, our HyRadix reformer performed wonderfully to provide hydrogen to fuel these groundbreaking vehicles," said Bob Gray, CEO of Eden Hydrogen. "With the U.S. on the road to a hydrogen economy, national events such as the Road Tour expand public awareness of hydrogen's use as a transportation fuel today."

About Eden Hydrogen Inc.

Eden Hydrogen Inc., a wholly owned U.S. subsidiary of Eden Energy Ltd (ASX:EDE), is a diversified clean energy company providing global hydrogen energy solutions. The company focuses on producing, storing, and delivering hydrogen solutions for industrial and consumer manufacturing processes, transportation fueling applications, and onsite power generation. Hydrogen technologies developed and marketed by Eden include HyRadix® on-site hydrogen generation systems and supply solutions and Hythane®, a near zero emissions alternative fuel. For more information, please visit www.edenhydrogen.com or www.edenenergy.com.au. To view Eden Energy's eMedia Kit please visit: <http://www.ccapreview.com/clients/eden/mediakit/>.
