## **EDEN ENERGY'S HYRADIX INC. ANNOUNCES SUPPLY AGREEMENT WITH PRAXAIR INDIA**

Perth, Western Australia – Eden Energy's Chicago based subsidiary HyRadix® Inc., a leading provider of on-site hydrogen generation systems and supply solutions, has entered into an agreement with Praxair India, a subsidiary of US based Fortune 300 company, Praxair, Inc., for the supply of the HyRadix Aptus® on-site hydrogen generator for industrial hydrogen applications within India. This multi-year agreement covers the certification of the HyRadix Aptus hydrogen generator via the Praxair vendor qualification process as well as the exclusive supply of the Aptus generator to Praxair in India for industrial gas sales purposes.

The Aptus hydrogen generation system allows customers to have economical on-site hydrogen production with high reliability for uninterrupted manufacturing processes such as metals annealing, float glass production and edible oils hydrogenation. The systems produce high purity hydrogen from a feedstock of natural gas or liquefied petroleum gas (LPG) and can be combined to generate between 50 - 500 Nm<sup>3</sup>/h very economically compared to alternative means of delivered hydrogen.

“We are very pleased to be working with Praxair, the leading industrial gas supplier in India, in such an exciting and rapidly growing market as India,” said Greg Solomon, Chairman of Eden Energy. “This is yet another validation of the technology the HyRadix team has developed which is coming along at just the right time for the Indian market. Whilst Praxair will only be marketing the Aptus units to industrial customers, their additional unit requirements will provide greater fabrication economies of scale which will greatly assist our efforts in India in the transportation fuel market where the same units will be used for Hythane® and hydrogen refueling.”

“As the Indian economy continues its rapid pace of growth it is becoming more difficult to satisfy the demand for hydrogen from existing indigenous sources,” said David Cepla, President of HyRadix. “The feedback we have received indicates customers are very receptive to our Aptus technology because it fills a significant void in the market place, so we are anticipating strong sales growth as we fill that market void.”

Eden Energy recently announced that world renowned Larsen & Toubro, the largest engineering company in India, has commenced manufacturing the HyRadix Aptus reformers in India, which will be used to supply Praxair for the hydrogen industrial gas

market in India, and also to provide the hydrogen necessary for Eden's Hythane® powered bus and generator projects in India which will commence in 2008.

#### About HyRadix

HyRadix, an Eden Energy company, is the leader in providing proven, on-site hydrogen generation systems and supply solutions. Based in Chicago, HyRadix serves the global market by providing dependable hydrogen solutions for industrial and consumer manufacturing processes and transportation refuelling applications. Through its proprietary technology, HyRadix is meeting the rapidly growing global demand for lower-cost hydrogen. For more information, visit [www.HyRadix.com](http://www.HyRadix.com).

#### About Eden Energy

Eden Energy Ltd. is diversified clean energy company listed on the Australian Stock Exchange (ASX:EDE). Eden has interests in hydrogen storage and transport fuel systems, including the low emission Hythane hydrogen-methane blend, coal seam methane and conventional gas as well as low temperature pyrolysis research into hydrogen production and geothermal energy production. For more information, visit [www.Edenenergy.com.au](http://www.Edenenergy.com.au).

#### About Praxair India

Praxair India, headquartered at Bangalore, is the largest industrial gas producer in India, with more than 35 operating locations and 2006 consolidated sales of \$130 million. More information on Praxair India is available at [www.praxair.com/india](http://www.praxair.com/india). Praxair India's parent company, Praxair, Inc., is the largest industrial gases company in North and South America, and one of the largest worldwide, with 2006 sales of U.S. \$8.3 billion.
